GITAU DANIEL NGIGE

Full-Stack Developer | Django - Django REST Framework - Next.js

Naivasha, Kenya | +254 703 509 598 | dangitau9824@gmail.com

Portfolio: danielgitau.vercel.app | **GitHub:** github.com/DannyDuke77 | **LinkedIn:** linkedin.com/in/daniel-g-76ab1b246

PROFESSIONAL SUMMARY

Junior full-stack developer specialising in designing and building API-driven web applications, from backend data models to responsive user interfaces. Experienced in developing real-time systems, multi-business applications, authentication and access control, and third-party payment integrations. Complemented by practical IT infrastructure experience in networking and technical support.

TECHNICAL SKILLS

Languages	**Python**, **JavaScript**, **TypeScript**, HTML, CSS
Backend	**Django**, **Django REST Framework**, Channels (WebSockets), REST APIs
Frontend	**Next.js**, React, Tailwind CSS, TanStack Query
Data & Messaging	**PostgreSQL**, MySQL, **Redis**, relational schema design
Security	Authentication and authorisation (JWT, role-based access), API rate limiting
DevOps & Tooling	**Docker**, Docker Compose, Nginx, Linux, Git & GitHub, Postman
Integrations	M-Pesa, REST API integrations
IT Infrastructure	LAN networking (switches, access points, IP phones, CCTV), Cat 6 cabling, technical support

PROJECTS

FLUX — Cross-Department Ticketing System github.com/DannyDuke77/FLUX

Django, DRF, Django Channels, Redis, Next.js, TypeScript, PostgreSQL, Nginx, Docker

- Built a real-time ticket management platform using Django Channels, WebSockets and Redis, enabling authenticated clients to receive ticket updates instantly.
- Designed **department-based access control** with organisation-level data isolation, so users only see and act on tickets relevant to their department and organisation.
- Implemented a controlled **ticket lifecycle** with enforced status transitions and activity tracking, plus searchable, filterable listings and CSV and PDF reporting.
- Containerised the full stack (Django, Next.js, PostgreSQL, Redis, Nginx) with Docker Compose, and improved backend performance and reliability through query optimisation, rate limiting and upload validation.

RentWise — Multi-Business Rental Management Platform github.com/DannyDuke77/RentWise

Django, DRF, Next.js, Tailwind CSS, PostgreSQL, Docker, Nginx, M-Pesa

- Designed a **multi-tenant platform** supporting multiple independent businesses, with organisation-level data isolation and **dedicated portals** for landlords and tenants.
- Modelled **properties**, **units**, **tenancies** and tenant relationships in PostgreSQL, with role-based access across platform, landlord and tenant accounts.
- Built rent payment tracking with arrears calculations, financial statements and receipts, giving landlords visibility into collections and outstanding balances.
- Integrated **M-Pesa** so tenants can pay rent directly through the tenant portal.
- Delivered a Django REST Framework API and a responsive Next.js and Tailwind CSS frontend as a decoupled, Dockerised application.

E-Occurrence — Digital Police Occurrence Book System github.com/DannyDuke77/E-Occurrence

Django, PostgreSQL, Tailwind CSS

- Digital occurrence book and case-tracking system with role-based access and audit logging, improving case transparency and accessibility.

WORK EXPERIENCE

IT Intern (Industrial Attachment) *Jan 2026 – Apr 2026* Superior Hotels Kenya – Naivasha Units

- Provided IT support, diagnosing and resolving technical issues across the Naivasha units.
- Configured and troubleshot network infrastructure including switches, access points, CCTV and IP phones.
- Assisted with Cat 6 cabling and ongoing infrastructure maintenance.

EDUCATION

Bachelor of Business Information Technology (BBIT) 2022 – 2026

Kabarak University
